Mando Diao - Without Love

Tom: D

```
                Em
Remember all those fights we had
G                           D
Maybe they meant nothing to you
             Em
Or were you looking for some action
      G                     D
Those things I never understood

Gbm                     Em
How many times did you lie to me
Gbm                     Bm
How many times did you say
                Gbm                             Em
It's gonna get better that's for sure my love I promise
G                             A
Babe I'll be all right now any day

                    Em
But it was without love
G                D
No no no without love
        Em
Without love
G                D
No no no without love

          Em
When you told me babe it's over now
  G                           D
I simply did not know what to do
    Em
For you it was an easy thing
    G                         D
But I just stood there like a fool

Gbm                             Em
Soon you started calling in the evenings
Gbm                              Bm
Your voice was spilling over with regrets
    Gbm                      Em
You said you wanted us to be together
     G                         A
That all sad memories we should forget

                            Em
```

```
But you said it without love
G                D
No no no without love
        Em
Without love
G                D
No no no without love
        Em
Without love
G                D
No no no without love
        Em
Without love
G                D
No no no without love

        Em
Without love
G                D
No no no without love

( Em  G  D )
( Em  G  D )
( Em  G  D )
( Em  G  D )

                      Em
You said it without love
G                D
No no no without love
             Em
Oh, without love
G                D
No no no without love
                      Em
You said it without love
G                D
No no no without love
        Em
Without love
G                D
No no no without love
        Em
Without love
G                D
No no no without love

( Em  G  D )
```
