Sugar Ray - Iron Mic'

Tom: Db

standard sugar ray tuning (Eb, Ab, Db, Gb, Bb, eb)

riff 1 (intro riff: this is also played at weird parts like a couple
of seconds before the loud part of the chorus and after the chorus.
= i dont know if he hammers on here, it doesnt really sound like it
but it would sound better if you did.)

riff 2 (pre-chorus: palm mute the entire riff. this is my best guess)

riff 3 (chorus riff) first chorus outro

riff 4 (major distortion and do some miscellaneous

Intro: to riff 4 palm muting on some parts)

riff 5 (this is a bridge on some parts of the song that you only do
two times in the song. the first time you do this, do riff 5 once then
go into that ending fill, but the second time around do riff twice
then go into the ending fill)

riff 5 continued outro

riff 6 (last chorus) last chorus fill: 1 and 2

riff 7 (ending riff: before starting
this riff, pick scrape down strings) ending bit
