

# 2AM Club - Worry About You

Tom: Ab

(forma dos acordes no tom de G )  
Capostrate na 1ª casa

For as long, long as I can remember  
Its been December, no sun no summertime to treasure  
We weren't grown  
And every time that they told us surrender  
It will be better  
We'd just go holding on till forever  
To what we know

Broken lover yes I made you  
Believe that I would be the one to heal you  
And if you go now out that doorway  
I won't say you're wrong  
But you know that I'll worry about you

For as long long as she can remember  
She wanted better  
No home no one there to protect her, all alone  
And so she told me I was her center  
Nothing would tempt her  
I still roamed  
Just like her father left her, ooh he left her

( D Bm )

Broken lover yes I made you  
Believe that I would be the one to heal you

And if you go now out that doorway  
I won't say you're wrong  
But you know that I'll worry about you  
Isn't it bad you've been a good victim  
You thought I was worth it you act like I would listen  
And maybe you were right at one point someday  
I used to watch you treat the streets like a runway  
I used to write with tears on your pretty painted face  
Sign language on your back from the first taste  
So when he whispers in your ear and you think of me  
You wish I would've treated you like you treated me  
When you wake up from your dreams to the hallway  
Sleepwalking through the streets dressed in all gray  
Blinking streetlamps in the window pane  
I worried from the second that I learned your name  
Everything in love is light  
But where was I last night  
And why don't you feel right  
Broken lover yes I made you  
Believe that I would be the one to heal you  
And if you go now out that doorway  
I won't say you're wrong  
But you know that I'll worry about you
