

49 Winchester - Damn Darlin?

```
tom:
                                                                    [Terceira Parte]
Intro: D A Bm A
       G D E A
                                                                    Then the jukebox started playing for the first time all night
                                                                                          Gbm
                                                                    Since the band loaded out and they said their goodbyes
[Primeira Parte]
                                                                    And the first song they played was one she loved to hear
It was the night before Christmas nineteen ninety five G
                                                                    So you listened as you finished your beer
You broke her poor heart and she shattered your pride
                                                                    [Quarta Parte]
Outside that little honky tonk in Nashville, Tennessee \frac{G}{A} \frac{D}{D}
                                                                   And then that tear that Hank talked about, fell right on in G D E A
Neon never looked so dim to me
                                                                   Out of your eye and over the \ensuremath{\operatorname{rim}}
[Segunda Parte]
                                                                   Of that glass that just became your only true friend {\bf G} {\bf A} {\bf D} Hearts break harder, at the old Exit/In
So you went back to your barstool, reopened your tab
The barkeep came by and asked why you looked so sad {\color{red} D}
                                                                    [Refrão]
Well you said it was nothin, but you knew that was a lie
                                                                                   D A
                                                                                           Bm
                                                                    Then you said daaamn, darlin'
Tried your best not to break down and cry
                                                                    [Refrão]
                                                                   With no daa-amn, darlin'
               D A Bm
Then you said daaamn, darlin' A G D
                                                                    Oh Nashville you?ve broken my heart
Oh why?d you have to leave me alone in this bar
                                                                    [Final]
     D A Bm
With no daaamn, damn darlin'
                                                                    Oh Nashville you?ve broken my heart
Oh Nashville you?ve broken my heart
                                                                    Oh Nashville you?ve broken my heeeeeeart
                                                                   G G D Em D
Woh oh you have broken my-y, my heart
( D A Bm A G )
( D E A )
( D A Bm A )
