Abbey Glover - Help Me

```
                           tom:
                    C
                                                Am
                 C                    Now everything?s turned into grey
Help me out                                    F
                          G                    No more  sun
I really need your help right now
                 Am                   I?m screaming
I can?t seem to find a way out         G
    F                                 Hold me, hold me, hold me honey
Alone                                       C                Am
         C                            Can you hold me, hold me now
My brains not functioning                   G
          G                           You always knew the words to say
I could really do with something            C          Am
           Am                         To make everything all okay
To keep my mind of everything               F
                 F                    And I miss you
That?s going on                             G          C
                                      And I need you tonight
I?m screaming
     G                                ( Am   G   Am )
Help me, help me, help me honey
    C                 Am              F  G  Am
Can you help me, help me now          I?m screaming
         G                                G
You always knew the words to say      Help me, help me, help me honey
         C          Am                    C                Am
To make everything all okay           Can you help me, help me now
    F                                          G
And I miss you                        You always knew the words to say
         G          C                         C          Am
And I need you tonight                To make everything all okay
         C                                 F
Looking at myself                     And I miss you
            G                                 G          Am
I really don?t like what I see        And I need you tonight
                 Am              F             F
And the mirror keeps saying nasty things to me  Oh honey I miss you
         C                                    G
You used to make me feel pretty       And I need you
         G                                 C
Light up the dark days                Tonight
```
