

# Adele - Never Gonna Leave You

Tom: C

I know sometimes you're scared of the light  
 But how will you ever know if you never try?  
 There's something new  
 Inside my heart  
 And it cries like a child  
 Whenever we're apart  
 I see your face under every sky  
 I find the less I look, the more I find

So let's go back there, back to the start  
 I swear I'm never gonna leave you  
 You're the only one I want  
 Let's go back there, back to the start  
 You know I'm never gonna leave you  
 'Cause you're the only one I want

You know sometimes that I'm scared of the dark  
 But I'm feeling so brave when I'm in your arms  
 You said my name in the death or glory  
 You hold me alright  
 When I'm short of falling

So let's go back there, back to the start

I swear I'm never gonna leave you  
 You're the only one I want  
 Let's go back there, back to the start  
 I swear I'm never gonna leave you  
 'Cause you're the only one I want

There will be times  
 When we'll try to give it up  
 Bursting at the seams  
 No doubt that will almost fall apart  
 Then burn to pieces  
 And we'll watch them turn to dust  
 But without each other  
 Nothing is easy enough

So let's go back there, back to the start  
 I swear I'm never gonna leave you  
 'Cause you're the only one I want  
 Let's go back there, back to the start  
 I swear I'm never gonna leave you  
 'Cause you're the only one I want

You're the only one  
 Never gonna leave you  
 No, I'm never gonna leave you, no
