

Alice Cooper - The Ballad of Dwight Frye

```
Interlude 3X E G D C
Intro: E G D C 2X
                                                               (I wanna get out of here,
                                                                                                I've wanna get out of
                                                             here.)
I was gone for fourteen days, I could have been gone for
                                                               (I gotta get out of here,
                                                                                                 I've got to get out of
Held up in intensive care ward, Lying on the
                                               floor.
                                                               (I gotta get out of here,
                                                                                                 I've got to get out of
I was gone for all those days, But I was not all a-lone;
I made friends with a lot of peo-ple in the danger zone
                                                              See my lone-ly life un-fold
                                                                                             I see it ev-ry day
                                                                      D E
                                       D
See my lone-ly life un-fold
                               I see it ev-ry
                                                              See my lone-ly mind ex-plode,
                                                                                               blow up in my face
        D
             E A
                                       D
                                                              Interlude 3X E G D C
See my only mind ex-plode,
                             since I've gone a-way
                                                              I grabbed my hat I got my coat I ran into the street
I think I lost some weight there, And I'm sure I need some
                                                             I saw a man that was chok-ing there I guess he couldn't
Sleeping don't come very easy In a straight white vest.
                                                              Said to my-self, this is ver-y strange, I'm glad it wasn't
Sure like to see that little children, She's only four years
old old
                                                             But now I hear those sirens call-ing And so I am not
                                                              (I didn't want to be)
C-riff
                                                              (I didn't want to be)
{\tt I'd} give her back all her play things even even the one {\tt I}
                                                              (I didn't want to be)
                                                                     D
                                                                                                               E
                                                              See my lone-ly life un-fold
                               I see it ev-ry day
See my lone-ly life un-fold
                                                                     D E A
                                                              See my lone-ly mind ex-plode,
                                       D
                                                                                              blow up in my face
                               when I've gone in-sane
                                                             Ending in "E"
See my lone-ly mind ex-plode,
```
