Bahamas - Lost In The Night
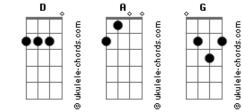

```
Tom: D
Intro: D  A  D
          A  D  A  G

A  D                    D
I'm lost in the light
A  D                    D
I pray for the night
A  D          A         G
To take me, to take me to
A  D                D
After so many words
A  D                D
Still nothing's heard
A  D          A         G
Don't know what we should do
        D       A       G      A        D
So if someone can see me now, let them see you

A  D                      D
It was my greatest thrill
A  D                    D
But we just stood still
A  D              A                    G
You let me hold your hand 'til I had my fill

A  D                    D
Even countin' sheep
A  D                    D
Don't help me sleep
A  D              A                    G
I just toss and turn right there beside you
        D       A       G      A        D
So if someone could help me now, they'd help you too.
                    G
They'd help you to
                 A
See you through
                    D                    G
```

```
All the hard things we've all gotta do
                              G
Cause this life is long
                                A
And so you wouldn't be wrong

         D         A         G
Bein' free, leavin' me on my own

A  D              D
And I held my own
A  D                      D
Still I rattled your bones
A  D                      A              G
I said some awful things and I take them back

A  D                D
If we would try again
A  D                D
Just remember when
A  D              A                    G
Before we were lovers, I swear we were friends
         D         A         G      A        D
So if someone could see me now let them see you

                              G
Let them see you
                              A
See you through
                              D                    G
All the hard things we've all gotta do
                              G
'Cause this life is long
                                A
So you wouldn't be wrong

D               A               G
Bein' free here with me on my own
```
