

Banners - Into The Storm

Tom: A

If you're far from home
 Broken on a lonely road
 Helpless when the sky explodes
 Then I need you to know
 When you're 'round the bend
 Close your eyes and count to ten
 I'll walk through hell and back again
 Anywhere you go

If your sky is falling down
 I'll be right beside you now
 And I'll keep you warm
 Yeah, I'll keep you warm

I'll follow you into the storm
 Follow you into the storm
 I will, I will
 Be with you when you call, carry you till the dawn
 I will, I will

Follow you into the storm
 Oh, be with you when you call
 Carry you till the dawn
 Follow you into the storm

Anywhere that you go
 Anywhere that you go

I'll follow you into the storm
 Follow you into the storm
 I will, I will
 Be with you when you call, carry you till the dawn
 I will, I will

Follow you into the storm
 So violently
 Held captive by your gravity
 Hold your breath and wait for me
 Where the wind may blow
 Through night and dark
 Through fantasies that fall apart
 Know you're always in my heart

Anywhere you go

If your sky is falling down
 I'll be right beside you now
 And I'll keep you warm
 Yeah, I'll keep you warm

I'll follow you into the storm
 Follow you into the storm
 I will, I will
 Be with you when you call, carry you till the dawn
 I will, I will

Follow you into the storm
 Oh, be with you when you call
 Carry you till the dawn
 Follow you into the storm

Anywhere that you go
 Anywhere that you go

I'll follow you into the storm
 Follow you into the storm
 I will, I will
 Be with you when you call, carry you till the dawn
 I will, I will

Follow you into the storm
 Follow you into the storm
 Follow you into the storm
 Follow you into the storm
 Follow you into the storm
 Follow you into the storm
