

## **Bee Gees - Love You Inside Out**

```
Tom: D
Baby, I can't figure it out your kisses taste like honey
Sweet lies don't gimme no rise
Oh, oh what you're trying to do?
Livin' on your cheatin' and the pain grows inside me
It's enough to leave me crying in the rain
Love you forever but you're driving me insane
        D7M
and I'm hanging on Oh, oh
Oh I'll win, I'll never give in, our love has got the power
Too many lovers in one lifetime
ain't good for you
You treat me like a vision in the night
Someone there to stand behind you
           Fm
When your world ain't working right
I ain't no vision, I am the man
                                 who
Em Gbm
             Bm
Loves you
            inside out
backwards and forwards with my heart hanging out
    Gbm
           Bm
    love
           no other way
What am I gonna do if we lose that fire?
Wrap myself up and take me home again
Too many heartaches in one
```

```
Let this moment be forever
         Em
we won't ever feel the storm
                                    Gbm
I ain't no vision, I am the man
            Bm
      Gbm
Loves you inside out
 backwards and forwards with
   D7M
my heart hanging out
          Bm
Em Gbm
  love
          no other way
What am I gonna do if we lose that fire?
Don't try to tell me it's all over
I can't hear a word I can't hear a line
No man could love you more
And that's what I'm cryin' for
You can't change the way I feel inside
 You are the reason for my laughter and my sorrow
 Blow out the candle I will burn again tomorrow
     man on earth can stand
between my love and \ensuremath{\mathtt{I}}
And no matter how you hurt me
         Em
I will love you till I die
                                     Ghm
I ain't no vision, I am the man
                                    who
      Gbm
Loves you inside out
 backwards and forwards with
my heart hanging out
Em Gbm
          Bm
I love
          no other way
What am I gonna do if we lose that fire?
```

## Acordes

lifetime ain't good for me

I figure it's the love that keeps you warm
