

# Beetle Juice - What I Know Now

Tom: E

m

Intro: Em C B7

I was hot  
 I went to parties a lot  
 Y'know?  
 I was driving Lamborghinis  
 Sipping super-dry martinis  
 In the tiniest bikinis on a yacht  
 But I was depressed  
 Also completely obsessed  
 An unhappy beauty queen  
 Who dreamed to be Miss Argentina  
 I had such low self-esteem  
 I was a mess  
 So I gave it all up for the netherworld  
 I've been here forever, girl  
 If I was more clever, girl  
 I would've stuck it out  
 Knowing what life's about  
 Pain and joy and suffering  
 Failing but recovering  
 I'll tell you another thing  
 Everyone here is alone  
 So if you are breathing  
 Go home!  
 If I knew then  
 What I know now  
 I would have looked within and let love in somehow  
 If I only knew  
 The truth back then  
 I wouldn't have had my little accident  
 Don't be blind  
 You left your whole life behind  
 See a shrink  
 Call a priest  
 Ask the recently deceased

Death is final and you cannot press rewind  
 Don't jump when the light is red  
 Toasters should be used for bread  
 Never smoke cigars in bed  
 Nietzsche was right, y'know, to live is to suffer, bro  
 Don't cheat on the one you wed  
 Never whip a thoroughbred  
 Angry pygmies shrunk his head  
 Why did it take death to see  
 Happiness was up to me?  
 If I knew then  
 What I know now  
 I would've laughed and danced  
 And lanced every sacred cow  
 I thought I knew  
 But I was wrong  
 'Cause life is short  
 But death is super long  
 I exploded!  
 If I knew then  
 (If I knew)  
 What I know now  
 I would've crossed every line  
 And drank all the wine  
 Before my final bow  
 If I knew (If I knew)  
 The things that now I know  
 I would ride the highs and cherish the lows  
 Going, it's a quick trick 'round the rodeo  
 So before they lower the curtain, be certain to enjoy the show  
 That's what I know!  
 Life is short but death is long  
 Here, one minute then it's gone  
 Thought I knew but I was wrong  
 If I only knew what I know now
