

## **Ben Folds - Landed**

```
Tom: Eb
                                                                she made from nothing
  Bb
                                                                so nothing ever made them right
We'd hit the bottom
                                                                she liked to push me
I thought it was my fault
                                                                and talk me back down
and in a way I guess it was
                                                                till I believe I was the crazy one
I'm just now finding out
                                                                and in a way
what it was all about
                                                                Eb
                                                                I guess I was
We moved to the west coast
                                                                Chorus
away from everyone
she never told me that you called
                                                                If you wrote me off
back when I was still
                                                                I'd understand it
                                                                Cm
I was still in love
                                                                cause I've been on
Chorus:
                                                                some other planet
Bb
                                                                Cm
Till I opened my eyes and walked out the door
                                                                so come pick me up
                                                                           Ab7 Bb7
        \mathsf{Cm}
                                                                I've landed
and the clouds came tumbling down
         Eb
               Bb
                                                                            Ab7
and its bye bye goodbye I tried
                                                                And you will be so
                                                                Bb7 Ab7
                        Fm
and I twisted it wrong just to make it right
                                                                Happy to know
                                                                Bb7
                                                                       Bbm
had to leave myself behind
                                                                I've come alone
            Eb
                 Bb
                                                                      F
and ive been flying high all night
                                                                it's over
                                                                Intro: (1x)
so come pick me up
                                                                Chorus
I've landed
Intro: (2x)
                                                                                (INTRO)
                                                                Come pick me up
                                                                                (INTRO)
                                                                Come pick me up
The daily dramas
                                                                I've landed
```

## **Acordes**
