

# Blue - Red Light Song

tom:

Intro: E A E A

There's a red light shining way down below

And I'm sitting on this aeroplane wondering if they know

If they could all get together they could make the things go right

I'll keep it burning, burning, right through the night

And I can feel the heat

I can see the fire

I can feel the heat

Getting higher and higher

You know the world seems small when you're flying high above

And the only thing that's missing is a universal love

Just a spark is all that's needed, to set the world alight

Let's keep it burning, burning, right through the night

And I can feel the heat

I can see the fire

E A E Gbm  
I can feel the heat  
Getting higher and higher
