

# Bob Marley - Babylon By Bus (álbum)

Tom: A

chord transcriptions and arrangement by kevin gardner

## Notes

This album recorded during the Wailers 1978 world tour features the guitar stylings of three great guitarists, namely Junior Marvin, Al Anderson, and of course Bob Marley. On one hand this album is filled with difficult bass/guitar riff syncopation that almost defies transcription. On the other hand the general chord progression of many of the songs are quite simple. What follows are the chords played by Bob throughout the songs. Some songs only have one or two guitar chords, however due to the syncopated riffs of the lead guitars the songs stay musically interesting.
