

Broken Bells - After The Disco

Tom: D

Intro: Bm A E

After your faith has let you down

I know you'll want to run around

And follow the crowd into the night

But after the disco all of the shine just faded away

Oh oh oh oh, do what you want, do what you will

Don't tell me it's not our time

Cause I'm waiting here much too long and

Don't assume, that I need your

love. The chill of night has got you dancing away and I'm

Not the dreamer, or the dream you're

Em
Out there looking for

How did I get in this winding maze of love?

And there's something wrong and it's sending you

round and round til we go nowhere

Instrumental

Bm A E

I see the ashes on the ground

I know the world is burning down

And under the cold and empty moon

But after the disco all of the shine just faded away

Oh oh oh oh, do what you want, do what you will

Don't tell me it's not our time

Acordes
