

Carrie Underwood - Were Young And Beautiful

Tom: **G**

We're Young and Beautiful
 Tabbed by: angel_of_music

Watching a video, I saw that the guitarist shifted. So here's one way to play it:

This is the same, but it's easier to play because you don't have to shift.

I play this one for the intro because I can get more of the

distortion.

To play the rest of the song, I suggest playing the one submitted by pighinator found <http://?id=31258>. If you notice, you can still hear the riff out the song. So when you play the **A** chord. Just imagine this tab for the riff...

...and blend it in with the **A** chord like this

You can be the judge of the strums.
