

Chameleo - Oblivious Desires

Tom: **Db**

(com acordes na forma de **C**)

Capostrate na 1ª casa

(Am,C,Em,**B**)

My eyes are getting heavy

Body's feeling numb

Face my head, pull the trigger of the gun

It's late at night, but the city lights

Are still so bright

I'm falling asleep

Take me to the place of endless possibilities

Where reality becomes

Insanity?

Decode my soul, my oblivious desires

I see you there

Standing in the light

Open your eyes, look into the mirror

Jump inside

I'll take you for a ride

Decode my soul, my oblivious desires

People only see what they are ready to confront

You may seem lost, I know the feeling mi amigo

But your inside your fucking egoed mind

Tricky serpent comes here every now and then

Trying to led me into the forbidden tree

You had to be dead to understand

My my eyes were trying to say

I'm falling again

Into a dark hole away from all normality

Cause reality is so cruel

I wanna get away?

Decode my soul, my oblivious desires

Aren't you afraid of being in the dark?

The boy was dragged by some creatures in the forest

Everyone have a demon deep inside

Decode my should, oblivious desires

I see you there coming back to life

Hold my hand, cause I know that you're tired

Time to go back to your mediocre life

Wake up little man

It's already 10am

Put your armor

And go face the world ahead

Mom and daddy keep on calling me a dreamer

They don't know that I'm a just a big 0 schemer

I'm just a big 0 schemer

Oh I'm such a dreamer

Acordes
