

Chloe Moriondo - Road Trip

tom:

I don't have my license yet

But I think it might be fun to drive with you

You live far and I don't have a car

But I think it might be fine and the sky

Looks so blue

We'd fill up with gas and we move pretty fast

Is that something you'd like to do?

It's crazy I know but I wanna go

And I was hoping that you would too

'cause when the moon comes up at night

I'm just thinking of you

And when the stars shine this damn bright

All I think of is you

And I think it's starting to rain

And you're all that goes on in my brain

So maybe it'd be nice to get away

Petals are floating and I think I'm choking

On air

Raindrops get bigger and I'll start to

Shiver

But darling, you're still there

'cause when the moon comes up at night

All I think about is you

And when the stars shine this damn bright

All I think about is you

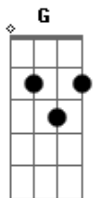

And I think that it's starting to pour

But you're all that I wanted and more

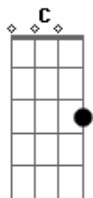

So maybe

Just maybe you'd open the door
