

# Citizen Cope - Salvation

Tom: **G**

Tabbed by: Taylor Mason

Email:

Tuning: Standard

There are only 6 chords in this song, and you can listen to it for the strum pattern, he basically hits the bass note ( **E** or **A** depending on the chord) first and then strums the from there.

Intro:

## VERSE

The verse is all the same throughout the whole song, Just two chords...Its the same the chorus as well

Say, Judas came up to D.C, He'd been down in Georgia for a while...

## CHORUS

Same strum pattern, only using these chords. You hit them each about three times, i'm too lazy to tab it out like that. Repeat Twice.

## BRIDGE

I could be wrong on this part, but i think its just a open "C" chord using your thumb to a base line

Thats more or less it. You just finish with the verse structure like most of the song. quite sure about the bridge but its close. Simple song but good nonetheless.
