

City And Colour - Meant To Be

tom:

Intro: C Bb Am F

When I grew up
I had big city dreams
I wondered if the Bible was wrong
What the hell were they teaching me?
I was lost in thought
And I could not hide it
But the sun - it kept on risin'
So, I played along
But now that you're gone and
And I write down this song
I don't believe this is how it's meant to be
The church bells they ring
You can hear the mourners sing
They still believe
This is how it's meant to be
The wheels touch down
All I can see is your face
Amidst the noise of the lights
The last thing on my mind was my faith
And then the morning came
And the sun started rising

But I was missing my friend
So, how do I carry on?
Cause now that you're gone and
And I write down this song
I don't believe this is how it's meant to be
The church bells they ring
You can hear the mourners sing
They still believe
This is how it's meant to be
Like a mother bird crying out for its young
I will sing it loud with all the might in my lungs
Cause now that you're gone and
And I write down this song
I don't believe this is how it's meant to be
The church bells they ring
You can hear the mourners sing
They still believe
This is how it's meant to be
(C Bb Am F)
Oh how it's meant to be, yeah
[Final] Bb Am F C
