

Dan + Shay - Alone Together

Tom: Ab

(forma dos acordes no tom de G)
Capostrate na 1ª casa

I couldn't help but notice you were sitting by yourself
Dropping limes in a Corona like
You're trying to get over somebody else

It's funny how you're story sounds a little like mine
Oh, cause' I've been at a table with a
Bottle peeling labels to pass the time

We can be blue eyes and neon light
Singing them sad up songs all night
We can say goodbye, just head home
But, if we're going to be alone

We should be alone together
Kissing over there in the corner where nobody else can see
Keeping each other company
We should be alone together
Leaning up against my car door
Parked outside on the street, where it's just you and me
We should be alone together

I couldn't help but notice you could use another drink
Yeah, I don't wanna leave ya
And it's two for one Tequila so what you think?
We can be blue eyes and neon light

Singing them sad up songs all night
We can say goodbye, just head home
But, if we're going to be alone
We should be alone together
Kissing over there in the corner where nobody else can see
Keeping each other company
We should be alone together
Leaning up against my car door
Parked outside on the street, where it's just you and me

We should be alone together
We should be alone together
We should be alone together, oh yeah
We should be alone together
Over there in the corner where nobody else can see

We should be alone together
Kissing over there in the corner where nobody else can see
Keeping each other company
We should be alone together
Leaning up against my car door
Parked outside on the street, where it's just you and me

We should be alone together
We should be alone together
We should be alone together, oh yeah
We should be alone together
