

# Dan + Shay - Alone Together

Tom: Ab

(forma dos acordes no tom de G)  
Capostrate na 1ª casa

I couldn't help but notice you were sitting by yourself  
Dropping limes in a Corona like  
You're trying to get over somebody else

It's funny how you're story sounds a little like mine  
Oh, cause' I've been at a table with a  
Bottle peeling labels to pass the time

We can be blue eyes and neon light  
Singing them sad up songs all night  
We can say goodbye, just head home  
But, if we're going to be alone

We should be alone together  
Kissing over there in the corner where nobody else can see  
Keeping each other company  
We should be alone together  
Leaning up against my car door  
Parked outside on the street, where it's just you and me  
We should be alone together

I couldn't help but notice you could use another drink  
Yeah, I don't wanna leave ya  
And it's two for one Tequila so what you think?  
We can be blue eyes and neon light

Singing them sad up songs all night  
We can say goodbye, just head home  
But, if we're going to be alone  
We should be alone together  
Kissing over there in the corner where nobody else can see  
Keeping each other company  
We should be alone together  
Leaning up against my car door  
Parked outside on the street, where it's just you and me

We should be alone together  
We should be alone together  
We should be alone together, oh yeah  
We should be alone together  
Over there in the corner where nobody else can see

We should be alone together  
Kissing over there in the corner where nobody else can see  
Keeping each other company  
We should be alone together  
Leaning up against my car door  
Parked outside on the street, where it's just you and me

We should be alone together  
We should be alone together  
We should be alone together, oh yeah  
We should be alone together
