

Danny Worsnop - Don't Overdrink It

tom:

Intro: D

I can hear that buzz coming a mile away

I've got a one way ticket, it's been a long damn day

Coming over the bar and picking up steam

Better set it down before it makes a wreck out of me

If it's there too long I'm gonna finish of the whole damn thing

Don't overdrink it, you know that's what I'm thinking

When you try to get it all in one night that shit never works out right

Don't overdrink it, that ship's gonna come in sinking

It'll keep your hope afloat if you have just enough to let it go

But don't overdrink it

I know that monkey's got a hold on your back

For a lot of us when we twist that top and pour one up man it's hard to stop

I know whiskey ain't the answer but it's damn sure worth a

shot

Don't overdrink it, you know that's what I'm thinking

When you try to get it all in one night that shit never works out right

Don't overdrink it, that ship's gonna come in sinking

It'll keep your hope afloat if you have just enough to let it go

But don't overdrink it

No tequila ain't ever paid the rent

And the bourbon knows where my money went

The beer won't steer when I can't drive

And this car of mine won't run on shine

I've thought about this too long, now the whole damn bottle's gone

I overdrank it, don't know what I was thinking

I tried to fit it all in one night but I'm sure it's gonna be alright

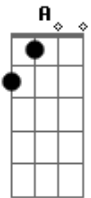

I overdrank it, got lost in the glasses clanking

All I know is my hope's afloat and I've had way more than I know, I know, I know I overdrank it
