   G                                          Bm
I'm tearing up, across your face
                                             D
Move dust through the light
                  G
To find your name
                       G
It's something faint
               D
This is not a place
                 A                            G
Not yet awake, I'm raised of make

Instead of carving up the walls

Why don't you open up with talk
G
'Cause we are ready, we are ready for the floor
