

Day - A Little Longer

```
(forma dos acordes no tom de G )
Capostraste na 2ª casa
Intro: Em G C D
                                                                                                                      G
You're under my skin, buried so deep
I wish you could read my mind
I'm on top of the top, so high
Come and give me a sign that this is for the life % \left( 1\right) =\left( 1\right) +\left( 1\right) +
I promise not to promise because I'm afraid
Promises are meant to break
Gosh, I do not want it to end
                                                                                                                                                                                           G
Because you're under my skin, buried so deep
                Em G C D
How did you get in here
Keep real while we're in love
                                                                                                 D
I really hope forever is enough
Let it be you let it be us
I pray to God
```

```
Let this fire burn a little longer
                     Fm
Let this fire burn a little longer
You do not understand when you hold my hand
             D
I have tingling everywhere
My name sounds a little bit different when you say that
                     Em
  Am
You do not understand when you hold my hand
            D
I have tingling everywhere
My name sounds a little bit different when you say that
Keep real while we're in love
I really hope forever is enough
Let it be you let it be us
I pray to God
                     Fm
                              G C D
Let this fire burn a little longer
                    Em
Let this fire burn a little longer
Let this fire burn a little longer
```
