

## **Dean Lewis - Be Alright**

```
It doesn?t matter, put the phone away
m (forma dos acordes no tom de Em )
                                                                  It?s never easy to walk away
Capostraste na 4º casa
                                                               Let her go oh oh oh
           Em
                                                               And it?ll be okay
  I look up from the ground to see your sad and teary eyes
You look away from me, and I see there?s something you're
                                                                  It's gonna hurt for a bit of time
trying to hide
                                                                 So, bottoms up, let?s forget tonight
         Em
And I, reach for your hand but it's cold, you pull away again
                                                                  You?ll find another and you?ll be just fine
And I wonder, what?s on your mind ind ind
                                                               Let her go oh oh oh
                                                                    Em
 And then you say to me you made a dumb mistake
                                                               But nothing heals
You start to tremble and your voice begins to break
                                                               The past like time
                                                                    Fm
You say the cigarettes on the counter weren?t your friends,
                                                               And they can't steal
they were my mates
                                                               The love you're born to find
And I feel the color draining from my face
                                                               But nothing heals
And my friend said
                                                               The past like time
  I know you love her but it?s over mate
                                                               And they can't steal
  It doesn?t matter, put the phone away
                                                               The love you?re born to find
 It?s never easy to walk away
                                                                  I know you love her but it?s over mate
But let her go oh oh oh
                                                                  It doesn?t matter, put the phone away
And it?ll be alright
                                                                  It?s never easy to walk away
                                                               But let her go oh oh oh
 So I asked to look back at all the messages you?d sent
                                                               And it?ll be okay
I know it wasn?t right but it was fucking with my head
And everything deleted like the past, it was gone
                                                                 It's gonna hurt for a bit of time
                                                                 So, bottoms up, let?s forget tonight
And when I touched your face I could tell you're moving on
                                                                  You?ll find another and you?ll be just fine
 But it?s not the fact that you kissed him yesterday
                                                               Let her go oh oh oh
It?s the feeling of betrayal, that I just can't seem to shake
And everything I know that tells me that I should walk away
                                                               It?ll be alright
But I just want to stay
                                                               It?ll be alright
And my friend said
                                                               It?ll be alright
                                                               It?ll be alright
  I know you love her but it?s over mate
                                                                           Fm
                                                               It?ll be alright
```
