

# Demi Lovato - Feed

tom:

A

Went to the mountain, drank all the wine

Walked through the valley, felt every high

I ran through fire, I did my time

I found my soul just to lose my mind

Met with the healers, prayed with the saints

All of the sinners know my name

There's scars I've caused and scars I've earned

Still don't know much, but here's what I learned

My demons are on the hunt

But my angels taught me how to run

I got two wolves inside of me

But I decide which one to feed

Some days are diamonds, some days are rough

Some days I'm tired, some days I'm tough

I built a bridge and burned it down

I found my wings just to lose my ground

One wolf howls while the other one sings

One wolf soothes while the other one stings

I hold on tight to things I've learned

But the wrong looks right when the tide has turned

My demons are on the hunt

But my angels taught me how to run

I got two wolves inside of me

But I decide which one to feed

One wolf howls while the other one sings

One wolf soothes while the other one stings (yeah)

My demons are on the hunt

But my angels taught me how to run

I got two wolves inside of me (yeah)

But I decide which one to feed (yeah)

I decide which one to feed
