

Demi Lovato - Without The Love

Tom: G
Intro: G D C C

[Verse I]
You pull my strings, and push my soul
You fool my heart with every note
You drop the beat, and kiss my face
You make me move, then cut the base
And you work so hard to get me, just to let me go
Yeah you put me in the spotlight, just to steal the show
And you try to take me home like you're domyshio, oh
It's such a joke

[Chorus]
Why are you singing me love songs
We're good as a love song, we're good as a love song without the love
Why are you singing me love songs
We're good as a love song, we're good as a love song without the love
Why are we acting like lovers, we dont know each other
Even though we used to rule the world
Why are you singing me love songs
We're good as a love song, a love song without the love

[Verse II]
I'm so confused, it's getting old, you wear your ring, but leave me cold
You're beautiful, but cause me pain
You play my heart like it's a game
And you work so hard to get me, just to let me go

Yeah you put me in the spotlight, just to steal the show
And you try to take me home like you're domyshio, oh It's criminal

[Chorus]
Why are you singing me love songs
We're good as a love song, we're good as a love song without the love
Why are you singing me love songs
We're good as a love song, we're good as a love song without the love
Why are we acting like lovers, we dont know each other
Even though we used to rule the world
Why are you singing me love songs
We're good as a love song, a love song without the love

[Bridge] = Single strum
This is the bending for the break
When we forget the harmony
This is how water colors fade into distant memories
Why are you singing me love songs
We're good as a love song, we're good as a love song without the love
Why are you singing me love songs
We're good as a love song, we're good as a love song without the love
Why are we acting like lovers, we dont know each other
Even though we used to rule the world
Why are you singing me love songs
We're good as a love song, a love song without the love
