

Devendra Banhart - My Ships

Tom: **E**

Album: nino rojo

This carries on throughout the song with some very small variations that are quite easy.

My ships are frozen sticks, they lay stuck to the floor
My wrists and my breasts are bleeding bricks, they don't float

anymore

And my tongue, it's a carbon scroll, ..doesn't burn anymore
And my friends are all useless lens, they don't see anymore
And all my chicks are all useless hens, they don't lay anymore
And my fists are plastic dice, they're the shape of the sun

And my love is a so long song gone forevermore
And I live where I, yeah I love where I, and I like where I live

Transcribed by ear, all my own work.
Good Luck
