

# Divide Music - All That's Left

tom:  
Intro: **Bbm Ab Db**  
**Bbm Ab Gb**  
I think back to when we were young  
Long before the end of what's to come  
When I saw you fall  
My heart went cold

How could I be the one to stay?  
On my own, I ran out to deliver ends  
For those lost in the never  
I can't take back what was done to you  
I went cold, but my eyes had a fever  
Blood red, I'll make them believers  
I can't take back what was done to you

It took the wind out of my sails  
I was blinded by the one who knew me well  
I watch behind illusion  
Keep myself at bay  
Fight for resolution  
But they all ran away

When I saw you fall  
My heart went cold

How could I be the one to stay?  
On my own, I ran out to deliver ends  
For those lost in the never  
I can't take back what was done to you  
I went cold, but my eyes had a fever  
Blood red, I'll make them believers  
I can't take back what was done to you  
I'm taking all that's left, one more with every step  
I never wanted less, your life was mine to bless  
I'll lay them all to rest to fill my empty chest  
I cry out
