

Dream Theater - Acid Rain (parte 2)

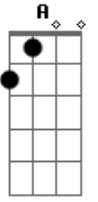

Tom: A

Bom, ta ai a segunda parte...fallow

Diagram illustrating energy levels and transitions between atomic states, organized into several vertical columns:

- Top Column:** Levels for $12p10h==12$, $12s=====24$, and $s==10$. Transitions are shown between these levels.
- Middle Column:** Levels for $10s=====22$, $s==12p5$, $7s=====24p12p==$, and $7-14p12p10p==7-17$.
- Bottom Column:** Levels for $5p2$, $0-0-0$, and $0-0-0$.
- Transitions:** Transitions are indicated by arrows between levels, often labeled with **PM** (Parity Matching) or **T** (Total Angular Momentum).
- Grouping:** Some levels are grouped together by dashed lines, while others are highlighted by solid lines.
- Reference:** A horizontal dashed line at the bottom serves as a reference level.
