

# Eden - Wake Up

Tom: C

**Dm**  
'Cause we've been driving so long

**F**  
I can't remember how we got here

**C**  
Or how we survived so long  
I'm trying to run from our pride

**G**  
Till you set fire to my atmosphere

**Dm**  
And I remember how I spent the 23rd

**F**  
Feeling six feet under when I'm 30,000ft in the air

**C**  
Chasing that sun down  
So far east I'm west bound

**G**  
Feeling like the edge of this world is near

**Dm**  
But you'll feel better when you wake up  
Swear to God I'll make up

**F**  
Everything and more when I get back someday

**C**  
This is more than just a phase, love  
Shooting stars all break up

**G**  
And even though it seems like half the world away

**Dm**  
Things will be better in America  
Heard the streets are gold there

**F**  
Maybe I can fly you out this place someday

**C**  
Chasing dreams like I'm on Novocain  
Screaming through your airwaves

**G**  
Looking back I almost thought I heard you say

**F** **Dm**  
Stay you're not gonna leave me

**F** **Dm**  
This place is right where you need to be

**G**  
And why your words gotta mean so much to them  
And they mean nothing to me

**F** **Dm**  
So stay you're not what you're hearing

**F** **Dm**  
'Cause I've been watching you changing

**C** **G**  
And who said you're one in a million anyway?

**Dm**  
'Cause you see only what you want to

**F**  
Your tunnel vision haunts you  
And you can't see what's wrong

**C**  
When you keep sleeping through the PM  
Eyes wide open when you're dreaming

**G**  
You're sleepwalking

Just keep talking

**Dm**  
Maybe you can talk your way out of this deep end

**F**  
No **B** plan in your system  
Just tell me what you're thinking

**C**  
I'm scared that you might fall

**G**  
But you're not  
But you're not

**Dm**  
And you'll feel better when you wake up

**F**  
Taking off your makeup

**C**  
**G**  
Sun always seems to wash our fears away

**Dm**  
And it's always shining somewhere

**F**  
I just gotta get there

**C**  
**G**  
And even though it seems like half the world away

**Dm**  
Things are better in America

**F**  
Heard the streets are gold there

**C**  
**G**  
Maybe I can fly you out this place some day

**Dm**  
Chasing dreams like I'm on Novocain

**F**  
Screaming through your airwaves

**C**  
**G**  
Looking back I almost thought I heard you say

**F** **Dm**  
Stay you're not gonna leave me

**F** **Dm**  
This place is right where you need to be

**C** **G**  
And why your words gotta mean so much to them  
When they mean nothing to me

**F** **Dm**  
So stay you're not what you're hearing

**F** **Dm**  
'Cause I've been watching you changing

**C** **G**  
And who said you're one in a million?  
You're so much better than that  
(**Dm F C G**)

**F** **Dm**  
Stay you're not what you're hearing

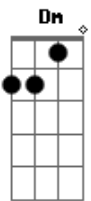

**F** **Dm**  
'Cause I've been watching you changing

**C** **G**  
And who said you're one in a million  
Anyway?
