

Emily Tries - June

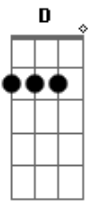

tom:
 June was when the Earth started to spin
 It was when the towers began to sing their hymns
 And the rivers engines started so
 That the rivers could start to flow, but
 Now it's November
 I'm stuck in November

And it's been November for too long
 In June the ice cracked and it felt so good
 The glaciers melted, there was a flood and I
 Drowned peacefully
 In June the angels were kind to me, but
 Now it's November
 I'm stuck in November
 And it's been November for too long
