

Finneas - Life Moves On

```
Tom: E
                                                               At the girl, that I once knew
                                                                               Α
                                                               But I've grown uncertain
                     В
                           D
                                             Dbm A
She said "you always had a way with people"
                                                               She said "It's just a bad dream"
"A way of letting them leave"
                                                               But she looked too happy
My hands could be the church to your fingers' steeple
 But you talk so mean
                                                               Life moves on
                  Gbm
She said "you know I love you"
                                                               The way life does
                                                                                   F
I said "remind me"
                                                               But some things are prettier
                                                               The way life was
                                                                                         Gbm
                                                               Before we gave each other love, gave each other love
Life moves on
The way life does
                                                               Life moves on
But some things are prettier
                                                               The way life does
            Dbm
The way life was
                                                               But some things are prettier
                                                               The way life was
Before we gave each other love, gave each other love
                                                               Before we gave each other love, love
Life moves on
The way life does
                                                               [Instrumental] Dbm B A
                   D
But some things are prettier
The way life was
                                                               Life moves on
                                                               The way life does
Before we gave each other love, love
                                                               But some things are prettier
And broken arms
                                                               The way life was
[Instrumental] E D Dbm B A
                                                               Before we gave each other love, love
Her silhouette
                                                               Life moves on
      Ab
                                                               The way life does
Glowed so familiar
      Dbm B
Through
                                                               But some things are prettier
                                                                           D
That blood red curtain
                                                               The way life was
                                                                         Gbm
I stood with strangers, gazing
                                                               Before we gave each other up
```
