In the hearts of men, in the arms of mothers

In the parts we play to convince others

We know what we're doing, we're doing it right

May have written books on the subject, but then you may still be surprised

By your tone over the phone, to your sister while waiting in line

At the shopping mall just outside of town

Oooh

In the hands of teachers, in the books you read

The things we say when we've lost the lead

I still try to speak up, when my voice won't make a sound

And I thought it all over too many times

When there is no use, and the lights are all out

I just give it up, and I walk home

Past the shopping mall that's just closing... Down

C
Oh-hoo, laa-da-da-da
