Flashlight Brown - Go And Die

Tom: C

Intro: G F G F G F G F
        G F G F G F G F

```
G                         F                          G
F
Tell me all about how things will never go too far
G                       F                     G
F
Situation normal you're still living in the dark
G                        F                          G
F
You don't seem to care that I don't have that much to say
G                              F
G                  F
Gives you more time to blather on about your boring fucking
day
```

```
 A                              Dbm            D
Bm
Oh my I don't know why I really hope you go and die
                  A              Dbm          D           F
So I can live here without you, and keep July

I wonder what you're telling her when I am miles away
Maybe that I'm screwing someone or I am turning gay
If you said something honest it would have to be a fluke
As all the rest of your bullshit dribbles out of you like puke

Anyone that falls for you is one less pain for me
Cause that just means they're way too stupid to see you like I
see
You treat your friends like crap but still you think my words
are crass
If you open your mouth again I'll kick your fucking ass
```

Acordes
