                                                               Do you want to come on and scoot/schooch
Well you done done me and you bet I felt it
                                                               On closer dear and I will nibble your ear
I tried to be chill but you're so hot that \underline{\mathbf{I}} melted
                                                               I've been spending way too long checking my tongue in the
I fell right through the cracks and I'm trying to get back
Before the cool done run out I'll be giving it my bestest
                                                               And bending over backwards just to try to see it clearer
And nothing's gonna stop me but divine intervention
                                                               But my breath fogged up the glass
I reckon it's again my turn? To win some or learn some
                                                               And so I drew a new face and I laughed
            Gb
But I won't hesitate no more
                                                               I guess what I'm a saying is there ain't no better reason
No more it cannot wait I'm yours
                                                               To rid yourself of vanities and just go with the seasons
(intro com solo)
                                                               It's what we aim to do
                                                               Our name is our virtue
Well open up your mind and see like me

Open up your plans and then you're free
                                                                                Gb
