# Florence and The Machine - Between Two Lungs

```
Tom: C
Intro: G x   G x G x G x F xx F xx
F xx F xx
Am x Am x Am x Am x G xx G xx
G xx G xx

C                                        F
Between two lungs it was released
                            C
The breath that carried me
                          Em
The sigh that blew me forward

               G
'cause it was trapped
F
Trapped between two lungs
     G       F
It was trapped between two lungs
     G   F                     C
It was trapped between two lungs

          C             F
And my running feet could fly
            C         F            C
Each breath screaming:  We are all too young to die!

(Double time Switching here)
C       F   C       F
C           F             C
Between two lungs it was released
                  F           C
The breath that passed from you to me
          F      C
It flew between us as we slept
                 F                 C
It slipped from your mouth into mine it crept
          F           C
Between two lungs it was released
                 F             C
```
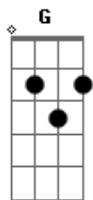

```
The breath that passed from you to me
          F           C
It flew between us as we slept
                 F                 C
It slipped from your mouth into mine it crept
C       F     C
                 G
'cause it was trapped
F
Trapped between two lungs
     G       F
It was trapped between two lungs

C                   F               C
Gone are the days of begging, the days of theft
        F          C
No more gasping for a breath
               F        C
The air has filled me head to toe
                 F              C
And I can see the ground far below
              F                  C
I have this breath and I hold it tight
              F                  C
And I keep it in my chest with all my might
          F                C
I pray to God this breath will last
              F              G
As it pushes past my lips as I...
G  F                  G   C
Gasp,                 Gasp.
            Em
Oh oh oh oh
           Am
Oh oh oh oh
           G
Oh oh oh oh
           C
Oh oh oh
```
