

Florence and The Machine - Hunger

```
And I could never get enough
  Bb Dm
                                                            I thought that love was on the stage
Ooh, ooh, ooh-ooh, ooh
                                                                                Bh
Bb Dm
                                                           You give yourself to strangers
Ooh, ooh, ooh-ooh, ooh
                                                           You don't have to be afraid
At seventeen, I started to starve myself
                                                            And then it tries to find a home with people, oh, and I'm
I thought that love was a kind of emptiness
                                                           Picking it apart and staring at your phone
And at least I understood then the hunger I felt
                                                                             Bb Dm
And I didn't have to call it loneliness
                                                            We all have a hunger
                                                           We all have a hunger

But the more I took, the more it took away
                                                           I forget to worry
