

Garth Brooks - She's Gonna Make It

```
Intro: Am7 G C Am7 G C D
                                                             And the fact that she's survived so well without him
                                                             You know it's driving him insane.
Verse:
                                                             And the crazy thing about it, is she's take him back.
                                                             But the fool in him that walked out, is the fool that just
                                                             won't ask.
He followed her to work this morning
He'd never seen that dress before.
                                                            She's gonna make it, and he never will
She seemed to sail right through those dark clouds forming
                                                            He's at the foot of that mountain, she's over that hill
                          D2
                                                                                C
That she knows he's headed for
                                                             He's sinkin' at sea, and her sails are filled
                                                                           Am G C D
  Bm
After seven years of marrige, he wanted out
                                                             She's gonna make it, and he never will
                                                                                 C D7sus C Am7 G C Am7 G C D G
                           G C
Now after seven months of freedom, it's clear that there's no Lord, She's gonna make it, he never will
doubt.
She's gonna make it, and he never will
                                                            Intro:
                             Gm
He's at the foot of that mountain, she's over that hill
                                                             Verse
He's sinkin' at sea, and her sails are filled
              Am G C
                               G
She's gonna make it, and he never will
Verse 2: same chords as first
You know it's not like she's forgot about it
                                                            Outro
```

She's just dealin' with the pain.

Acordes
