

Good Charlotte - Cardiology

Tom: C

Heart is a vessel that can carry you far away
 Further than you ever gone before
 It could swallow an ocean in the palm of your hand
 But only if you open up that door

CHORUS:
 Cardiology is guiding you and me
 Through ancient history, A new technology
 Cardiology is a mystery
 Verse 2

Is there a formula that could possibly explain
 What can feel so good bring you so much pain

Science is now help when we reach the day
 We face the truth that life can slip away

CHROUS:

.....

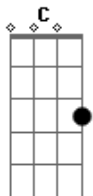

Verse 3:

Take apart this heart tell me where to start
 No book that I can find has the answer
 A medicine can't cure the fact that I'm still yours
 Even though you've gone on without me

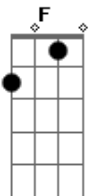

CHORUS:

Cardiology is guiding you and me
 Through ancient history, A new technology
 Cardiology is a mystery
