

## Good Charlotte - Ghost Of You

```
Tom: C
                                                              If it's you that I feel here haunting me forever
                                                              Pré-Refrão:
                                   Afinação: Fb Ab Db Gb Bb
                                                              GEM F G EM F G EM F
Eb Intro 2x: Am G Em F
                                                              I have been searching for traces of what we were
Verso:
                                                              Refrão:
Am
And I will wait until the end
                                                              A ghost of you is all that I have left
When the pendulum will swing back to the darker side of our
                                                              It's all that I have left of you to hold
hearts bleeding
                                                              I wake in the night to find there's no one there but me
I will save this empty space next to me like it's a grave
Where I lay a place for us to sleep eternally together
                                                              And nothing left of what we were at all
Pré-refrão:
                                                              Ponte:
                Em F G Em F G
I have been searching for traces of what we were
                                                              And I'm not looking for anything but us
Refrão:
                                                              Anything but what we were
                                                              And I'm not asking for painted memories
A ghost of you is all that I have left
                                                              I only want to know you're here
It's all that I have left of you to hold
                                                              Refrão:
I wake in the night to find there's no one there but me
                                                                              F7
And nothing left of what we were at all
                                                              A ghost of you is all that I have left
(Am G Em F)
                                                              It's all that I have left of you to hold
Verso:
                                                              I wake in the night to find there's no one there but me
                                                              And nothing left of what we were at all
So here I am pacing around this house again
With pictures of us living on these walls
                                                              A ghost of you is all that I have left
                                                              It's all that I have left of you to hold
I see my breath in the cold of the air that I breathe and I'm
wondering
                                                              I wake in the night to find there's no one there but me
I'm wondering if it's you that I feel
                                                              And nothing left of what we were at all
```
