Hanson - Look At You

Tom: G

```
   Em                    G A
Standing in the shadows
Em                         G A
wondering what I'm doing here
Em                           G A
Wishing something would happen,
Em                      G A
maybe I could disappear

She walks in with that look in her eye
Somehow she doesn't even have to try
Just kick off your shoes, get on the floor
This is what we came here for

A        Bm
Oooooh, you've got to break it down
C                     D
You've got to get it out
Just get on the floor

Em
Everybody wonders when they look at you
A                         D
Everybody wonders what you're gonna do
Em
You got it all wrapped up you do
A                              C         D       Em
Everybody wonders when they look at, look at you

In the middle of the dance floor
lights shinin' in my face
Twistin', shoutin' there was no doubt
people dancing all over the place

Out of the corner of my eye
she said why don't you come and give it a try
Get on the floor, just kick off your shoes
You ain't got a thing to lose

Oooooh, you've got to break it down
It's time to get it out
Just get on the floor

I was standing in the shadows
wondering what I'm doing here
Wishin' something would happen
so that I could disappear

She breaks the silence with a move of her hips
You better hang on don't want to lose your grip
Kick off your shoes, get on the floor
This is what we're waiting for
```
