

# Helene Fischer - Heaven Is Here

tom:

Intro: G C D G C G C D

I feel as if my heart could dance

Up to the stars, ascend

Where the air is so clear

You hold me close all through night

The magic feels so right

I see a rainbow in in the sky

And though it's dark outside

You taught me how

Each time I know that you are near

And I - I know that this is where I've never been

Now it's so clear

I fly on clouds upon the the wind

And I - I found your hand though I couldn't understand

How close, how near

The day you came into my life

Now I woke up from my pain

And I could breathe again

All my senses were there

I'm through with wearing only black

My laughter has come back

Because heaven is here

Now you're my lighthouse in the dark

Just like the missing part

That I so need

Since I surrendered all my fears

And I - I know that this is where I've never been

Now it's so clear

I fly on clouds upon the the wind

And I - I found your hand though I couldn't understand

How close, how near

The day you came into my life

And I - I know that this is where I've never been

Now it's so clear

I fly on clouds upon the the wind

And I - I found your hand though I couldn't understand

How close, how near

The day you came into my life
