

Henry Moodie - Pick Up The Phone

```
I?ll be here to let you know
                             tom:
                Ab (forma dos acordes no tom de G )
Capostraste na 1ª casa
                                                                  It?s gonna be okay
                                                                  Everyone needs a bad day
Some nights I don?t even sleep
                                                                  Remember you told me
Chest tight with anxiety
                                                                  You?re not alone
Stay up to see the Moon leave the sky
                                                                  Just pick up the phone
Some days I'm not even me
                                                                  And call me
Same old insecurities
                                                                  Whenever you?re feeling lonely
They tell me there?s something going wrong inside
                                                                  Remember you told me
I?ve been there
                                                                  You?re not alone
                                                                  Just pick up the phone
Down that road
When you need me
                                                                  You?re not alone
I?ll be here to let you know
                                                                  You?re not alone
                                                                  Pick up the phone
It?s gonna be okay
Everyone needs a bad day
                                                                  Pick up the phone
Remember you told me
                                                                  You?re not alone
You?re not alone
                                                                  You?re not alone
Just pick up the phone
                                                                  Pick up the phone
And call me
                                                                  Pick up the phone
Whenever you?re feeling lonely
                                                                  You?re not alone
Remember you told me
                                                                  You?re not alone
You?re not alone
                                                                  Pick up the phone
Just pick up the phone
                                                                  Pick up the phone
Breakdown 'cause you?re breaking through
                                                                  You?re not alone
No sky is forever blue
                                                                  You?re not alone
Things bloom whenever they?ve seen the rain
                                                                  You?re not alone
Your thoughts lie but I know the truth
The best days are ahead of you (ahead of you)
                                                                  It?s gonna be okay
Tomorrow isn?t your yesterday
                                                                  Everyone needs a bad day
                                                                  Remember you told me
I?ve been there
                                                                  You?re not alone
Down that road
                                                                  Just pick up the phone
When you need me
