I kinda came across this by accident as well. I was trying to write something of my own and some how ended up with this. This has been happening to me ALL the time lately..... weird huh? Again I haven't included the speed and all that but if you've heard the song you probably know that it's just strumming the chords really fast. It's easy to hear. And also once again I haven't included the power chord names cause I don't know them :) All I can say is POST MORE STUFF FROM PRETTY ON THE INSIDE!!! As usual my requests are ignored sigh..... Also, if anybody has the rest of this could you send it to me? That would be really great cause this is just the main riff. You can play with it a bit. For a SLIGHT variation you can try sliding up to the power chords instead of just playing them straight. It still sounds pretty much the same though. I've included the lyrics for those of you

some parts, this song is hard at times. There is practicly no way you can fugure them out from the way they're written in the album insert. If any body wants the lyrics (the correct ones that is) for practicly

Well that's it for now. I'll post the rest when I figure it out. Sorry that the lyrics aren't easier to read. I didn't put any periods or anything in there so they might be a bit hard to follow.
