

Huntar - Anyway

```
Intro: F Am G
  Verso 1:
  Follow my heart, follow my feet
                                                                G
  All the advice that I take
  Fall into line, fall into place
  All of these rules that you make
  I know you want me to be something more
  But I know what I'm doing is right for me
  Pré refrão:
  I don't need a silver lining,
                                                                                                                      Am
  I don't need your hold
                                                                                                                              Am
  I can't seem to see you smiling,
  But it's okay, okay
  I, I didn't need it anyway!
  Refrão:
Am G
I didn't need it anyway!
                                                I didn't need it anyway!
  Verso 2:
  Follow my heart, all of my dreams
  Give me a reason to change it
  Pull them apart, split them to seas
                                                                                G
  I won't forget where I came from % \left( 1\right) =\left( 1\right) \left( 1\right)
  Why won't you let me to be who I am?
  When I know what I'm doing is right for me?
