

# Iron Maiden - The Talisman

Tom: A  
(com acordes na forma de )  
Intro:  
As the captain calls us on the deck I take my things  
and walk  
Heaven's rain upon us falls  
Blinded from the sea spray salt  
Clasping anything we can hold  
Twenty days without a meal  
And ten without freshwaters too  
To the harbor side I glance back one last time.....  
Fleeing our nation our problems we leave behind  
Those that didn't die in storms  
Ships by the tenfold Out on the tide  
The scurvy rest did slaughter  
We are pleased to be out and embracing the open sea  
Westward the tide...  
Free from the troubles And more free from thee  
Westward we sale on...  
Inheritors unfulfilled reason behind us  
We flee from what is not What is will be  
I'm sure someone will eventually upload this with a solo but  
heres right after it  
We flee the earth And face our harsh reality  
We approach the other side  
Will death be low mist That hangs on the sea?  
Of the ocean with the tide  
We run from evil tongues Rash judgement, selfish men  
In our favor just for once  
Never to be seen On these shores again  
Welcome greeting our new land  
As we sail into ocean size and lose sight of the land  
The elation in our hearts  
A face of contentment around in the air  
The excitement in our veins  
Were off now to seek all our fortunes to the land  
As we sail towards the coastlines  
of.... our..... dreams  
Of our golden promised land  
Electric  
Running the waves...  
No theres no one going back....  
As we ride the rough seas...  
Weary limbs fatigued away  
Spirits, sails they drive us on...  
I have no life left in me  
Four leagues of ten...  
No more strength and nothing left to give  
Holding on for our dear lives...  
Must find the will to live  
limbs fatigued, trembling with cold  
Never thought that we could make it

Truly sights of shores divine

The sickness I am dying from

Never wanted it to end this way

Westward the tide....

Sail by the talisman....

## Acordes
