

# Islou Silva - Hino da Farmácia

tom:

Intro: Am G F E  
Am G F E

A cura do homem no passado  
Que por meio de unguentos se dava

Foi pelo eterno hipócrates

Do tempo dos deuses tirada  
Da inesgotável fonte de Deus

O homem de remédios se proveu  
Dos fartos recursos naturais

Com sabedoria se serviu

Oh! Que herança inaudita farmácia, ciência milenar

De galeno as antigas boticas

Vieram a dor do homem minorar

Ergo os meus olhos bem alto

E contemplo a missão do saber

Que melhora a vida do homem

E com prazer o ajuda a viver

Da grande missão da ciência

Serei sempre um forte aliado

Em busca de conhecimento

Com a ética sempre ao meu lado

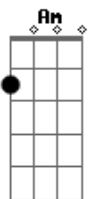

Carrego pra sempre em meus ombros

A intrépida vontade de vencer

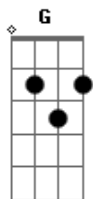

E cultuo no meu coração

O afã da cura nos trazer
