

# Issues - Disappear (Remember When)

Tom: G

Remember when I didn't need you?

Well I need you now, oh

To hold my head up high say

I just need a minute, sorry

Verso 1:

Some days I feel like a saint, I'm so alive

Some days I can't make any moves, it's like I have no spine

Can't do anything right

And when midnight comes I've run out of time to

Make some kind of difference

I constantly overlook the impact I've made

Maybe I'm longing to change my own face

To make you proud, I wanna make you proud

When you're looking down on me

Refrão:

My mind's wide open like starry skies

I ask God questions and wonder why

The hell that you're not here

I just wanna disappear with you now

Verso 2:

But I'm a selfish broken heart and how I got this far

Coping with the thought of holding you a minute longer in my arms

Is beyond me

I set you free, free

A product of a free world

Take wing over the coast of a better day

I'm stuck in my dark days

But I can be stronger than you remember

We're coming up on December, but I'm not cold

Refrão:

My mind's wide open like starry skies

I ask God questions and wonder why

The hell that you're not here

I just wanna disappear with you now

Verso 3:

Remember when I didn't need you?

Well I need you now

To hold my head up high say it's all better child

Remember when I was alone and crying out

You will be missed

I'm gonna miss you

But I know that you're all better now
